Color Key
0.6
0.7
0.8
0.9
Value
negative regulation of multicellular organismal process
death
heart development
regulation of protein modification process
regulation of BMP signaling pathway
BMP signaling pathway
transcription corepressor activity
head development
embryonic skeletal system development
face development
embryonic skeletal system morphogenesis
embryonic cranial skeleton morphogenesis
regulation of intracellular transport
multicellular organism growth
histone deacetylase binding
regulation of striated muscle cell differentiation
regulation of muscle cell differentiation
hippocampus development
limbic system development
